

Tax Year 2023 **1040 Quick Start Guide**

Introduction

This Quick Start Guide describes the installation process for the *1040 Desktop Software*. The Quick Start Guide not only contains easy to follow instructions for installing and configuring the software program but also includes other important information about system requirements, configuring your security options, EFIN, preparers, printers and billing schedules plus instructions for transmitting, receiving software updates and much more. An optional Setup Wizard is also available to guide you through the steps required to setup your software.

Please review the updated System Requirements section on page 6, to confirm that your computer or network meets the minimum or recommended requirements.

For additional information, please refer to the Help files of the program, or contact Partner Support.

Before You Begin Electronic Filing

IRS

To prepare or assist in the preparation of Federal Tax Returns, you must obtain a Preparer Tax Identification Number (PTIN) from the IRS. You must also obtain an Electronic Filing Identification Number (EFIN) from the IRS if you plan to file tax returns electronically. For more information on obtaining a PTIN or EFIN, please visit the IRS website at www.irs.gov.

How to Reach Us

If you require assistance with software installation or other information contained within this guide, please **contact** Partner Support at **206-209-2653**, or email us at help@erosupport.com.

System Requirements

Please review the system requirements for the *1040 Desktop Software*:

Workstation and Standalone Computer		
Operating System	Windows 10, Windows 11	
	Minimum	Recommended
Processor	2GHz or faster x86/x64 based CPU	2GHz or faster dual core x86/x64 based CPU
Memory	8GB (32bit), 8GB (64 bit)	16GB or more
Available Disk Space	1GB	250GB or more
Internet Connection	Dial-up Internet	Broadband Internet
Monitor Resolution	1024x768 or higher	
Printer	HP compatible laser printer supporting a Printer Control Language (PCL) or a GDI compatible printer. Please note this is due to bank requirements for properly printing checks.	
Networks		
The network system requirements are the same as the workstation and standalone computer requirements. For best results, the host computer should meet the recommended requirements listed above.		

Installing 1040 Desktop Software

The *1040 Software* may be set up as a standalone installation where the program will be used on one computer for completing and transmitting returns, or as a network installation where returns will be completed on multiple computers within the same office and transmitted from one or more computers on the network.

Whether you are installing on a standalone machine or a network, first install the software using the instructions found in the next section, “Standalone / Network Host Installation.” Instructions for configuring network workstations can be found in the “Workstation(s)” section of this setup guide.

Standalone / Network Host Installation

To install the program to a single computer or network host computer, follow these steps below:

1. Close all applications that are running on your computer.
2. Double-click the installation file. The Windows Installer will begin loading, and the Installation Wizard will open.
3. Follow the on-screen instructions in the Installation Wizard. (**Note:** The Installation Wizard will install the program to the C:\Xlink24 folder of the hard drive by default. If the program will be installed on a **network server**, change the destination drive letter to that of the network server.)
4. When installation is complete, click on **Finish** to open the program and continue to the next section, Configuration Wizard.

Configuration Wizard

When the program is opened for the first time you will be prompted to complete the initial configuration setup.

1. If the 2023 program (TY2022) is installed on the same computer, the prior year path will automatically display in the **Path** field.

- a. Click the  button on the right to navigate to the path of the prior year program, if necessary. **Note:** If you did not use the 2023 program, or you do not want 2023 information to proforma forward into 2024, leave this field **blank**.
- b. Enter the **Prior Year Login** and **Password** for the prior year program. **Note:** Leave this field **blank** if you did not enter a **Prior Year Path** from the step above.
- c. Enter your **User ID** and **Password** in the fields, then click the **Next** button.

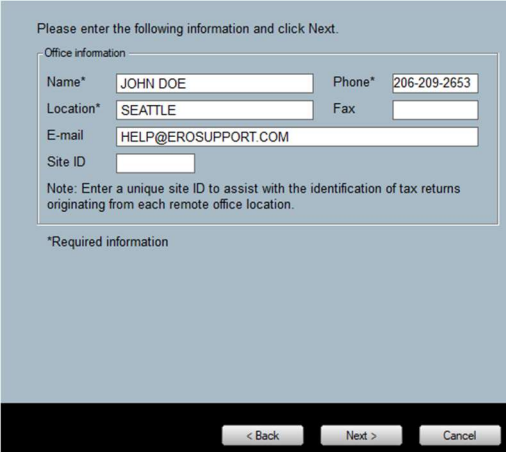

The screenshot shows the 'First Time Setup' dialog box. It has a title bar and a main area with the following text: 'Prior year information: Setup could not find a prior year version of 1040 Software on your computer. Please browse to your prior year 1040 Software directory. If you do not have the prior year software on your computer, skip this section.' Below this is a 'Path' field with 'c:\xlink23' entered and a browse button. To the left of the 'Path' field are red letters 'A' and 'B'. Below the 'Path' field are 'Prior year login' (with 'Admin' entered) and 'Password' (with '*****' entered) fields. Below these is a section titled 'The following information is provided by your sales representative and is included in your software packaging. If you do not have this information, please contact your sales representative at TBD.' It contains 'User ID*' (with 'User ID' entered) and 'Password*' (with 'Transmit PW' entered) fields. To the left of the 'User ID*' field is a red letter 'C'. Below this section is a 'Note: This information is required to continue with the installation.' and a '*Required Information' label. At the bottom right is the copyright notice '© CrossLink Professional Tax Solutions'. At the bottom are 'Next >' and 'Cancel' buttons.

2. Enter required office information, including your **Name** (company name), **Phone**, and **Location** (your city). Enter your **E-mail** and **Site ID**, if desired.

Note: A **Site ID** is used to manage centralized check printing in multi-office configurations. **Call Partner Support at 206-209-2653** if you have questions about Site ID's.

Click **Next** to continue.

The screenshot shows the 'Office information' dialog box. It has a title bar and a main area with the following text: 'Please enter the following information and click Next.' Below this is a section titled 'Office information' with the following fields: 'Name*' (with 'JOHN DOE' entered), 'Phone*' (with '206-209-2653' entered), 'Location*' (with 'SEATTLE' entered), 'Fax' (empty), 'E-mail' (with 'HELP@EROSUPPORT.COM' entered), and 'Site ID' (empty). Below these fields is a 'Note: Enter a unique site ID to assist with the identification of tax returns originating from each remote office location.' and a '*Required information' label. At the bottom are '< Back', 'Next >', and 'Cancel' buttons.

3. In the **Admin Password** field, type the password you want to use for the Administrator account, and then type it again in the **Confirm Password** field.

Important Note: Please choose a password that you can easily recall. You will use this password when logging in to the program for the first time.

4. In the **E-mail** and **Cell Phone** fields, type the e-mail and cell phone information for use with password recovery on your Administrator or “Admin” account.

Click **Next** to continue.

5. Enter a default **Enhanced Encryption Password (optional)**. Continue reading below for more information.

Note: Adding an Enhanced Encryption Password provides an extra layer of security. Choose a password you are sure to remember, or keep it stored in a safe location.

 **CAUTION:** Forgotten or lost Encryption passwords can lead to the loss of some or all your data.

Click **Next** to continue.

6. The selection for **Will this copy be used to Transmit to Central Site** has been pre-configured and cannot be changed locally. Please call **Partner Support at 206-209-2653**, if changes are desired.

If you have the 2023 program (TY2022) installed, select **Yes** next to each item you want to proforma forward into the 2024 program.

Click **Next** to continue.

Administrator

Admin is your primary login for the software. You will use Admin with the password you create below to log into the software. You can create additional logins after completing the First Time Setup.

Login: Admin

Admin Password*: *****

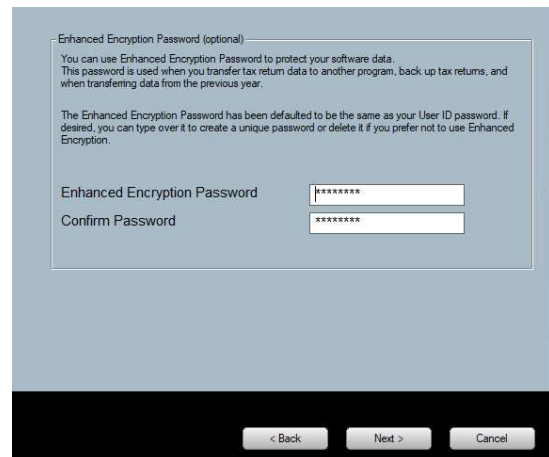

Confirm Password*: *****

Note: The Password must have upper, lower, special characters, digits, no spaces and be at least 8 chars

E-mail*: help@erosupport.com

Cell Phone*: 206-209-2653

< Back Next > Cancel

Enhanced Encryption Password (optional)

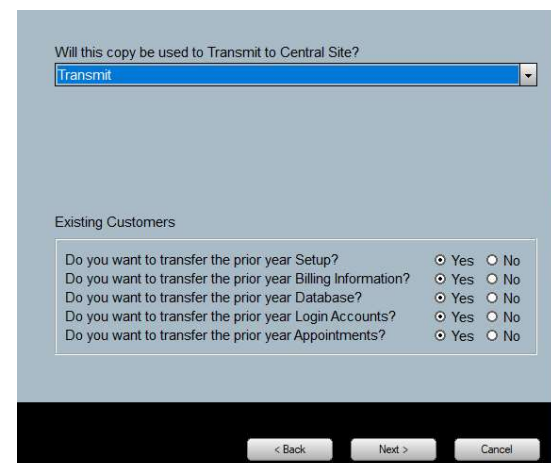

You can use Enhanced Encryption Password to protect your software data. This password is used when you transfer tax return data to another program, back up tax returns, and when transferring data from the previous year.

The Enhanced Encryption Password has been defaulted to be the same as your User ID password. If desired, you can type over it to create a unique password or delete it if you prefer not to use Enhanced Encryption.

Enhanced Encryption Password: *****

Confirm Password: *****

Once you've added a card or bank account, click **Reload Balance**, then select a desired amount to load to your Wallet – and then click **Save**. After completing your “balance add”, make sure to click **Exit** – or simply close the window.

Why do I incur a \$1.00 charge when I first vault my credit/debit card?

This \$1 charge represents confirmation of your payment method and is immediately voided. It is simply a transaction used to “save” your payment method on file.

For Automated Clearing House (ACH) vaults, there will be a one penny (\$0.01) charge.

Do I have to load a balance to my Wallet or will CrossLink just charge my card for each transaction?

All payments for charges incurred by using the software are processed through the Wallet. How your Wallet balance is loaded is up to you. You can choose to:

- Auto Reload your Wallet;
- Pay-As-You-Go; or
- Reload your Wallet manually.

Auto-Reload will replenish your Wallet using your default payment method whenever your Wallet balance drops below a level that you have selected. You will also choose the reload amount. This is all done at the time you vault your payment method.

Pay-As-You-Go will charge your default payment method whenever your wallet balance is at \$0.

If you choose **Manual Reload**, your default payment method will never be charged without your consent. Therefore, you will be responsible for reloading your Wallet balance manually whenever there is an insufficient Wallet balance.

Do I have to load money in advance onto my wallet in order to utilize Remote Signature Service or subscribe to a pay-per-return service?

No. You can set your Wallet to **Pay-As-You-Go** and not preload a balance. However, we recommend you load money onto your Wallet prior to using your software to ensure you are not subject to credit limits or billing issues with your credit card provider. These could result in your service being suspended.

How frequently will I be charged via my Wallet for services rendered?

As applicable, any eFile fee, Technology Fee or Prior Year Fee on Non Refund Transfer returns will be collected prior to a return being transmitted to the IRS. This is done as the return is processed through Central Site. Because charges occur in real time, it is advised that you always have a balance loaded onto your Wallet.

Regarding Remote Signature Service or Ancillary fees on Non Refund Transfer returns, these are accumulated throughout the day and charged one time –typically around 10:00 PM PT.

How can I view transactions that have been charged to my Wallet?

There is a **Transactions** tab in the Wallet section of your portal that you can use to view all transactions

against your Wallet. You can also access the **Invoices** tab to view both outstanding and paid invoices, which will include transactions that have taken place.

Is there a way for me to see which return a transaction corresponds to?

Yes. The **Invoices** tab in the Wallet section of your portal will summarize charges against specific returns.

If I have vaulted two credit/debit cards, will I be charged on my second card if the card is declined?

No. We only charge the payment option that you have set as a default.

How do I delete a credit/debit card off my Wallet?

After you have vaulted your new credit/debit card, there will be a **Delete** button that you can use to remove the credit/debit card you no longer want on file.

Regarding Remote Signature Service or Ancillary fees on Non Refund Transfer returns, these are accumulated throughout the day and charged one time –typically around 10:00 PM PT.

I received a *Declined* email relating to a Remote Signature Service fee. What happens next?

Remote Signature fees are accumulated throughout the day and charged one time – typically around 10:00 PM PT. If the charge is declined due to insufficient funds, an email is sent and you should access your Wallet to look for any unpaid invoices.

You are accessing this wallet from a parent Account. **Reload and Payment Functionality is Disabled.**
Access your wallet via Software to make payment updates.

Workstation(s)

Before beginning, please ensure that you have completed the following:

- Installed the program on a host computer, where the taxpayer data will be stored. See the [“Standalone / Network Host”](#) section of this guide for installing on a standalone machine or network host.
- The installation folder is shared on the host computer so it can be written to by each workstation computer. Please call Partner Support if you did not choose to share the folder during installation and you need assistance with sharing the folder.

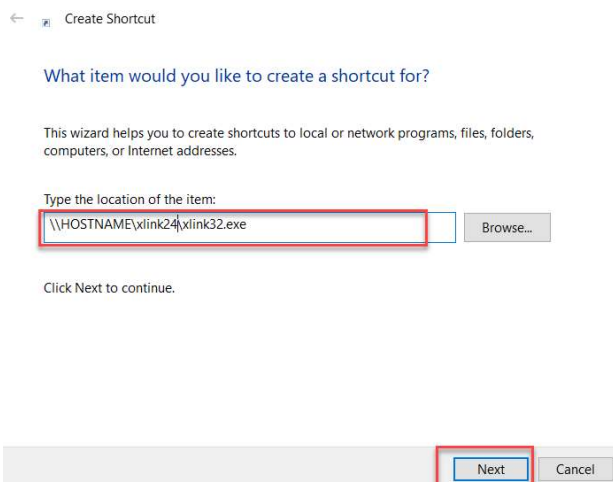

CAUTION: Do not install the program on the workstation. If the program is installed individually on each computer, the data will not be shared between the networked computers.

Begin by creating shortcuts on the workstation computer.

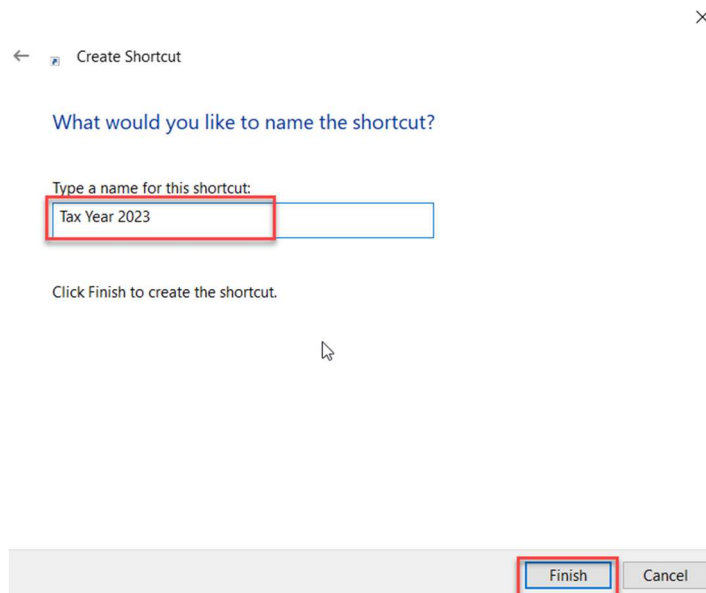

1. From the workstation computer, **right-click** on a blank space of the desktop, then choose **New**, and then **Shortcut**.

2. The Create Shortcut wizard will display. You will be prompted to **Type the location of the item**. Type '\\HOSTNAME\xlink24\xlink32.exe' where HOSTNAME is the name of the server computer, and then click **Next**.

3. You will be prompted to **type a name for this shortcut**. Type '**Tax Year 2023**' and **Finish**.

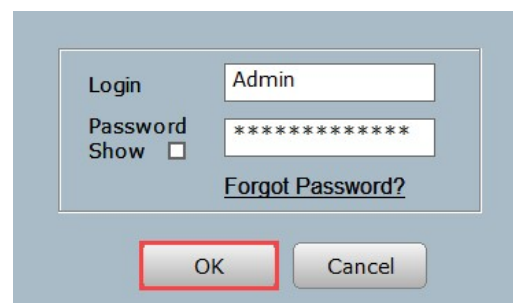

Program Setup

The options in the program are preconfigured to meet the needs of most users. This section covers options that must be configured before you can submit tax returns and other areas that, while not required, could save you time throughout the tax season.

If you proforma the settings from your prior year program when installing the software, many of these settings will be configured with information carried over from that program.

Logging into the program

1. Open the program by double-clicking the 2024 program icon on your desktop.
2. Type **Admin** in the **Login** field.
3. Type the **Password** for the administrator account, and then click **OK**. **Note:** Use the password you configured in **Step 3 on page 8**.

Multi-Factor Authentication (Optional)

After the first time Login, the program will present you with the option to enable **Multi-Factor Authentication** (MFA). MFA is an **optional** extra layer of security you can add to your account to prevent someone from logging in, even if they have your password. This extra security measure requires you to

verify your identity using a randomized 6-digit code **each time** you log in to the program. If you want to opt in, follow the steps below, otherwise skip this section.

1. After opting in you will be required to download the [Microsoft Authenticator app](#) or another compatible authenticator app . The app creates Multi-Factor Authentication codes and scans the software QR codes necessary for MFA.

2. Scan the MFA QR code that populates during install to complete the authentication account set up on the downloaded MFA app from your mobile device.

MultiFactor Authentication

This software uses multi-factor authentication for the login process to comply with the IRS Regulatory requirements. If you would like to use an authentication application to assist you during login, please download an authentication application from the Apple App Store or Google Play.

Use your authentication application to scan the above QR code for use during the login process.

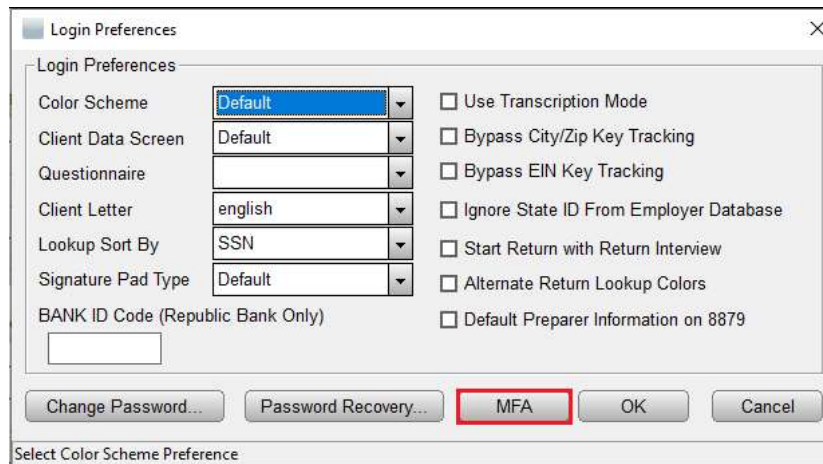

***Note:** You may choose to skip this process.*

3. Once the Tax Software's QR Code has been scanned and linked to the Authenticator App, the app will begin generating six-digit codes. The code will update every 30 seconds to ensure security (this may vary depending on the Authenticator App chosen).

The Tax Software will then provide a **Multi-Factor Authentication (MFA)** code request after the login for any user that has opted in. The generated code will be the one seen on the MFA Application.

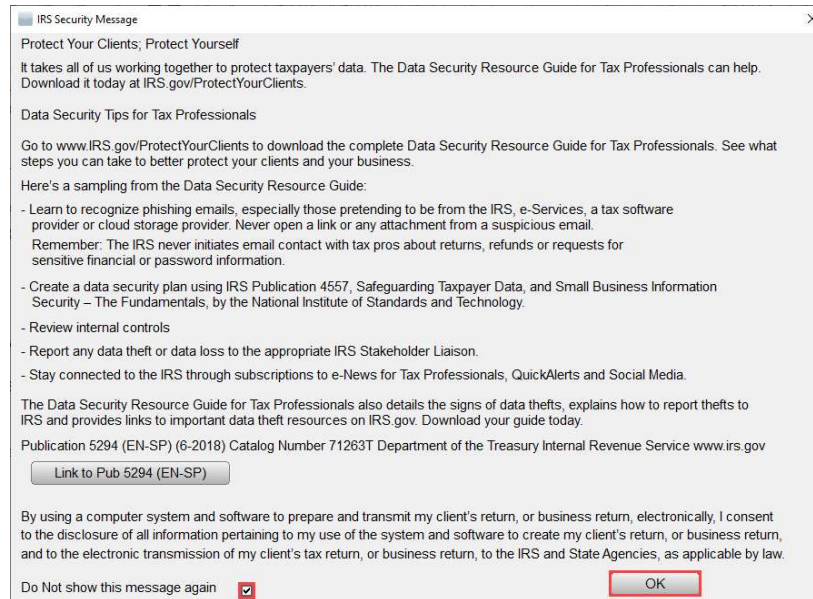

Important Note: The Multi-Factor Authentication can be disabled or enabled by clicking Utilities and then User Preferences menu bar. Click the MFA button to initiate the process.

IRS Security Message

The IRS is requiring all tax software programs to show an IRS Security message upon entry into the software. **Read the message** and then click the **OK** button.

Note: Click the **Do Not show this message again** box if you do not want to see this message each time you log into the program.

Software Setup Wizard (Optional)

The Software Setup Wizard can guide you through the configuration steps required for completing and filing your first tax return. The wizard also includes “**Extended Setup**”, to help you configure your printer, checks, additional logins, etc. A checkmark next to a section indicates that configuration for that section is complete.

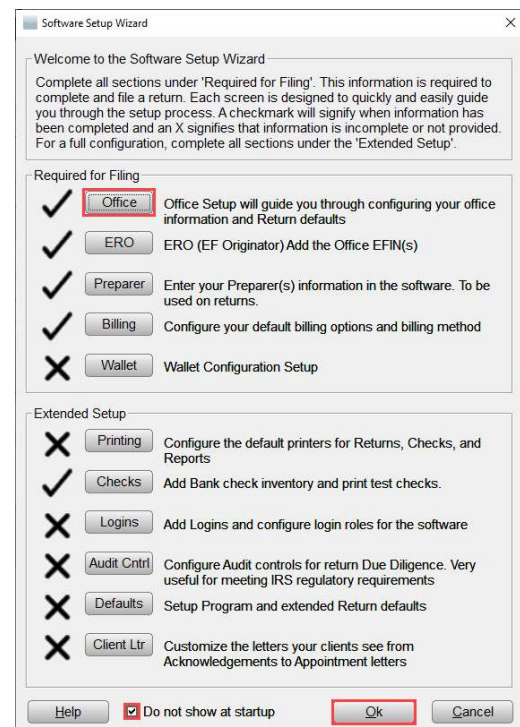

If you want to use the wizard instead of following this guide, begin by clicking on the **Office** button and then work your way downward after completing each section. Use the table of contents at the beginning of this guide to access detailed information about each section in the wizard.

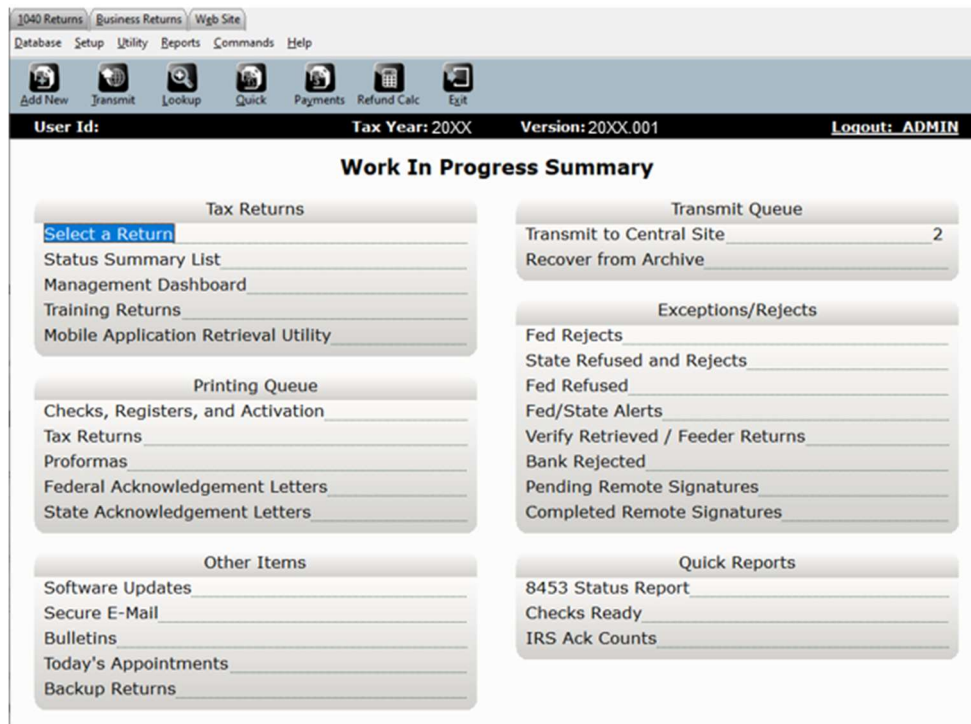

Note: This feature can be disabled by checking the box **Do not show at startup**.

1. To begin configuration without using the wizard, click the **OK** button and then continue reading below.

Work In Progress

The program will open to the **Work In Progress Summary (WIP)** screen each time you login to the program.

Navigation Tabs

By default, the program will open to the 1040 Returns tab. To access the **Business Return** section of the program or the **Website** section, click the respective tabs.

Menu Bar

The selections available in the **Menu Bar** vary depending on your location inside the program. To access a menu item, click the menu item to open the display list. (**Note:** To access a menu item using only your keyboard, press and hold **ALT** down on your keyboard, and then press the underlined letter in the menu item you wish to open. For example, to open the **Database** menu, press and hold **ALT**, then press the letter **D**.)

Toolbar

Use the **Toolbar** to quickly access frequently used features. Like the menu bar, the tools available are dynamic, and will change depending on your location inside the program.

Information Bar

The **Information Bar** contains information relevant to you. The information displayed here varies depending on your location inside the program.

Configuring Your EFIN

EFIN configuration will print on the Electronic Originator section of *Form 8879*.

To configure your EFIN within the program:

1. Click on **Database**, then **EF Originators**.

2. Type your EFIN in the **ERO's EFIN** field, then click **Add**. If your EFIN is already present in the screen below, double-click on it to access the EFIN record.

3. Complete the required information as you would like it to appear at the bottom of *Form 8879*. Refer to the field definitions below for more information.

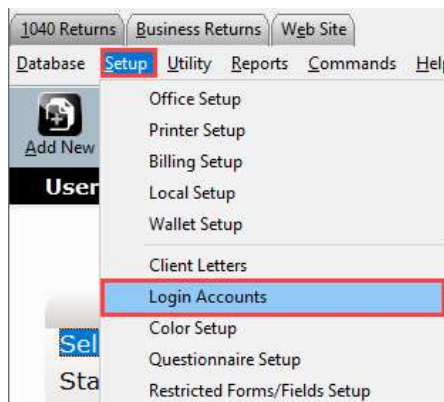

- a. **Self-Employed:** Check if ERO is self-employed.
- b. **Special Fee Process:** Will automatically be checked if the ERO is processing returns in Arkansas, Illinois, Maryland, Maine, or New York. These states require the ERO to charge the same fee for both financial and non-financial products.
- c. **Electronic Filer ID:** ERO's EFIN
- d. **SSN/PTIN:** Enter the EFIN owner SSN or PTIN.
- e. **EIN:** Enter the ERO's EIN/Federal Tax Identification Number.
- f. **ERO's Name:** The ERO's first and last name
- g. **Firm's Address, City, State, Zip:** Enter the items as you would like them to appear on the bottom of the *8879*.
- h. **Master EFIN:** This is auto filled by the Central Site, if applicable.
- i. **Service Bureau:** This is auto filled by the Central Site, if applicable.
- j. **PIN:** Type the 5-digit ERO signature PIN you would like to use on *Form 8879*.
- k. **Registered State of EFIN:** The state in which your EFIN is registered.
- l. **Registered Phone of EFIN:** The phone number listed in your EFIN registration with the IRS.
- m. **RAC Bank:** This is auto filled by the Central Site as the season nears. If the incorrect bank is present here, contact Partner Support.
- n. **ERO State Identification Code:** If you have a State-issued ID number which allows you to prepare returns in that state, enter the two-letter State Code and State ID.
- o. **ERO's Signature:** You can save time by capturing the ERO signature here instead of manually signing each *8879*. Click the **Capture Signature** button if you have a supported signature pad installed, then **sign** using the pad. Alternatively, click the **RemoteSign** button and follow the on-screen instructions. Contact Partner Support for additional assistance.

Configuring Your Preparer and Login Accounts

In this section, you can create and manage login accounts and their passwords. Create limits or allow access to certain functions of the program for groups of users by using **Access Levels**. It is important for each user to have a unique Login ID and Password and is required if more than one person is preparing returns for the software to operate optimally.

Paid Preparer information will populate to the bottom of Federal Form 1040.

1. From the WIP screen, click **SETUP** in the Menu Bar, then click **Login Accounts** to open the Login Accounts window.

Login Accounts Window

2. From this window you can **Add**, **Edit**, or **Remove** user accounts, and enter the **Access Levels Window**.
 - a. Click **Add** to open the Login Preferences window, allowing you to create a new login. If you select an existing user and click **Edit**, the Login Preferences window will open which allows you to change the settings for that user, including the password.
 - b. Select a user and click **Remove** to delete the selected user from the system. This cannot be undone. Consider disabling the preparers access to the program in their Login Preferences.
 - c. Click **Add**, to create a new preparer, then follow the steps below.

Login Preferences Window

In this section, the new and existing users passwords, access levels, and Preparer Shortcut ID can be set or changed along with any of the Login Preferences. **Note:** Once a Login ID is created, it cannot be changed. To create a new user, enter the information below.

Login Detail

- a. **Login ID** – The user will enter their ID into the program login box to access the software.
- b. **Login Name** – This will be displayed on the WIP (Work in Progress screen) in the software.

- h. Additional checkbox options are available. Hover your mouse over the option for more details.

Ready

Login Preferences

- j. Additional options are available. Hover your mouse over the option for more details.

Access Levels...

Access Levels Window

From the Login Accounts Window, click **Access Levels** to open the **Access Levels Configuration** window shown below. In this section, you can create new and modify existing access level groups.

- a. **Access Levels Configuration Window** allows for configuration of the selected level *via* the drop-down menu in the top right. After selecting the desired access level, highlight the function(s) from the left side list to add access or the right-side list to remove access. Then click the **Add** or **Remove** buttons to complete the process and customize the access level.
- b. To create a new access level, click **Add Level** and enter the new access level name. Follow step A above to customize the new access level.
- c. **Rename** will allow you to rename the currently selected access level. **Delete** will remove the access level from the system; this cannot be undone.
Note: The Administrator Access Level cannot be renamed or deleted.

Adding and Configuring Preparer Information

1. Click on **Database**, then **Paid Preparers**.

2. Type a Preparer ID in the **Preparer ID** field, then click **Add**. If a Preparer ID is already present in the screen below, double-click it to access the Preparer ID record.

Note: Each preparer must be assigned a Preparer ID. It can be any combination of letters and numbers between 3 and 7 characters.

3. Complete the required information as you would like the preparer information to appear at the bottom of Federal *Form 1040*.
 - a) If **Self-Employed**, check self-employed option.
 - b) Input **Preparer's SSN** (Do not use dashes).
 - c) If a **Third-Party Designee PIN** applies, input 5-digit pin to auto-populate to the return.

Preparer Id	Preparer Name
001	JOE TAX
002	TIM TIMMONS

- d) Input **Preparer's Name**.
- e) Input the **Preparer's PTIN**.
- f) Input the business **EIN**, if applicable.
- g) Input the **Firm's Address, City, State, and Zip**.
- h) Use the drop down to identify the **Preparer Type** of certification.
- i) Input **CAF** number, if applicable.
- j) Input **Office Phone** number.
- k) If the preparer has their own EFIN, input the EFIN in the **Electronic Filing ID** field.
- l) Input **Cell Phone** number (will also be used for Remote Signature, *TextLink*, and SMS).

- m) Use the drop down to select **Cell Phone Carrier** associated with cell phone number.
- n) Input **Email** address.
- o) Input the **PIN**. The PIN is a 5-digit Personal Identification Number chosen by the Paid Preparer to be used on *Form 8879*.
- p) Input **State Identification Number**, use state abbreviation to identify the state associated with State ID.
- q) To establish the **Paid Preparer Signature**, click the **Capture Signature** button if a supported signature pad is installed, then **sign** using the signature pad. Alternatively, click the **RemoteSign** button (a message will be sent to the provided Cell Phone. Follow on screen instructions to complete the process).

Office Setup

Office setup configuration of the program can be set by clicking **Setup**, then clicking the **Office Setup** menu option.

Registration Tab

Complete the software registration tab by inputting the information described below.

Note: This information may have been carried forward from the prior year.

- Input **User ID** received by the software provider.
- Input the Company **Name**.
- Input **Location** address.
- Input office contact **Phone** number.
- Input preferred **Email** address.
- Transmitting Computer**, Do not change unless instructed to do so by Partner Support.
- Transfer Incomplete Returns**: This option will set returns including incomplete returns, to be transferred to the transmitting computer.
- In the **Receipt Numbers** section, select if receipts will be a requirement, if receipts are to be auto assigned, and set receipt tracking ranges.
- Verification Settings** are set to monitor the integrity of a submitted return. Use radio buttons to identify prevention of transmission for fatal errors, warnings, or all errors/warnings.
- Shrink Verify List on Enter**: Select this box if you want the Errors on the Verify Error List to disappear as they are remedied during the verification of a Return.
- PayJunction API Setting**: If you've signed up with PayJunction to provide merchant/payment services, they will provide you with a login and password to enter here for integration with the software.
- Click the **APPOINTMENT ADDRESS** button option to add the Firm address to the calendar appointment letter.

E-Filing Tab

Configure E-Filing defaults and tax preparation requirements, including but not limited to, the IRS e-file Signature Authorization and the Electronic Bank Application.

- a. Input the location **Default EFIN** (Electronic Filing Identification Number).
- b. **Default SBIN** Not required
- c. The **IRS TeleTax Number** Pre-defined.
- d. If processing returns in NY or ME, **select the No Cross Collection in NY/ME** check box.
- e. If not sending acknowledgment letters to clients, select the **Discard ACK Letters** check box.
- f. Select the **Auto Generate PINs** check box to automatically generate PIN numbers on *Form 8879*.
- g. To create a verification return retention message for returns not including preparation fees, select the **Require Preparation Fee** check box.
- h. Select **Leave the Tax Return Status at Acknowledged for Bank Products** to leave the tax return status of an electronically filed return that has an associated bank product as Acknowledged until the bank product has been funded.
- i. Use the drop-down menu option to select when the system will **Prompt to File State Electronically**.

Overrides Tab (Optional)

This tab is optional. Information entered here will always appear in *Forms 1040* and/or *8879* and cannot be altered from within the return.

- Enter the first set of fields (**Company Name, EIN, Address, City, State, ZIP, and Self-Employed check box**). This will override other information entered and appear on all *1040forms*.
- Enter the second set of fields (**ERO'S Name, EIN, Firm Address, City, State, ZIP, Self-Employed check box, and SBIN**) for the information you wish to appear on every *Form 8879* you prepare.
- Input **State ID**.
- To activate verification of State ID, Check the **Required** check box.
- Use the **Auto-Add State Return** drop down menu options to automatically add a State Return based on the ERO provided address or the taxpayer residence address from the Client Data Screen.
- Use the **Default Taxpayer's phone number** drop down menu option to select number utilized for reports.

Defaults Tab (Optional)

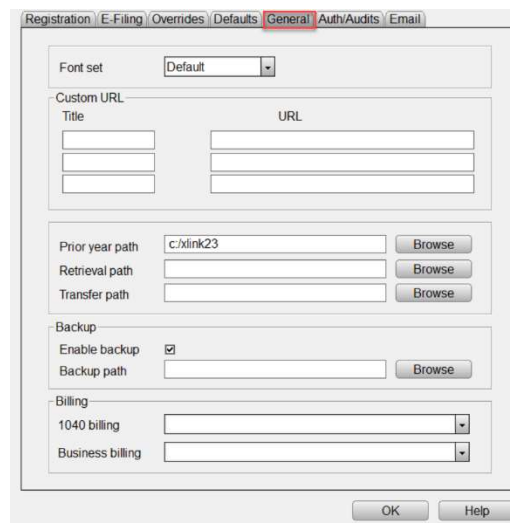

Use the **Defaults Tab** to set application-level settings, configure year to year transfer information, and set return-level requirements.

- Use **Tax Return Settings** to personalize program functions for return processing. Set options by selecting preferred program controls.
- Year to Year Settings** can be configured to exclude transfer information for *W2/1099* and scanned documents. Also, selection can be made to include year to year preparer information.
- Return Level Settings** can be configured to require third party designee, user status, and referral information.
- Click the **Default Values Button** to easily view the list of fields that have default values set, if any. You can easily remove the set values here too.

General Tab (Optional)

The **General Tab** will allow selection of font set, specification of return and backup path, also billing selection.

- Use **Font Set** drop down menu option to configure font size.
- Add additional Navigation Tabs to the program using the **Custom URL** settings.
- Set return location path for **Prior Year, Retrieval, and Transfer** returns.
- Enable **Backup** by selecting the **Enable Backup** option and specifying the **Backup Path**.
- Use the **Billing** drop down options to select specified billing schedule for **1040** and Business billing.

The screenshot shows the 'General' tab selected in a menu bar with options: Registration, E-Filing, Overrides, Defaults, General, Auth/Audits, and Email. The 'General' tab is highlighted with a red box. The interface includes a 'Font set' dropdown menu set to 'Default'. Below this is a 'Custom URL' section with 'Title' and 'URL' labels and corresponding input fields. Further down are three rows for 'Prior year path', 'Retrieval path', and 'Transfer path', each with a text input field and a 'Browse' button. The 'Prior year path' field contains 'c:\link23'. The 'Backup' section has an 'Enable backup' checkbox checked and a 'Backup path' input field with a 'Browse' button. The 'Billing' section has two dropdown menus: '1040 billing' and 'Business billing'. At the bottom are 'OK' and 'Help' buttons.

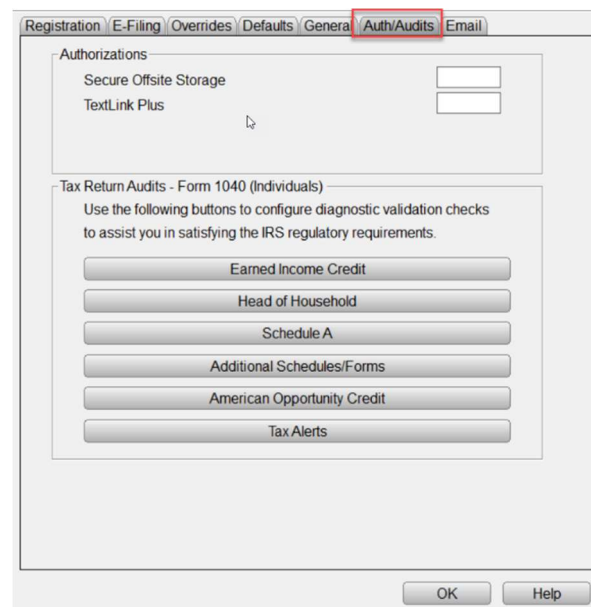

Auth/Audits Tab

This section contains authorization codes which enable access to additional program features. Codes are configured automatically during transmission to the Central Site.

Note: Non-transmitting computers must be configured manually by applying credentials from the transmitting location. Contact Partner Support for assistance.

Use the **Tax Return Audits** settings to configure additional diagnostic verifications. Diagnostic verifications assist in meeting IRS regulations and due diligence requirements for a variety of filing situations. Activate as many or as few audits as needed.

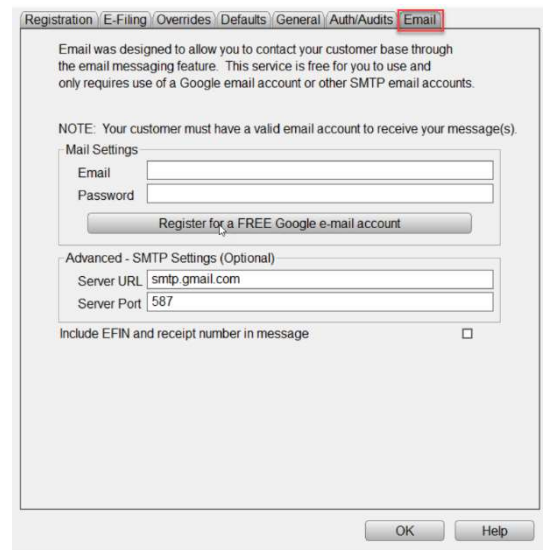

- To activate a tax return audit, click on the corresponding button under the **Tax Return Audit** section. The program will open a window like the one shown on the right.
- Place a check mark in the box next to each verification rule to be activated.
- Repeat steps for other audit sections needed in your office setup. You can remove an audit at any time by unchecking the corresponding box.

The screenshot shows the 'Auth/Audits' tab selected in a menu bar with options: Registration, E-Filing, Overrides, Defaults, General, Auth/Audits, and Email. The 'Auth/Audits' tab is highlighted with a red box. The interface is divided into two main sections. The top section, 'Authorizations', has two rows: 'Secure Offsite Storage' and 'TextLink Plus', each with a checkbox. The bottom section, 'Tax Return Audits - Form 1040 (Individuals)', contains a text instruction: 'Use the following buttons to configure diagnostic validation checks to assist you in satisfying the IRS regulatory requirements.' Below this instruction are six buttons: 'Earned Income Credit', 'Head of Household', 'Schedule A', 'Additional Schedules/Forms', 'American Opportunity Credit', and 'Tax Alerts'. At the bottom are 'OK' and 'Help' buttons.

Email

This tab contains the configuration settings necessary for text messaging and sending emails through the software.

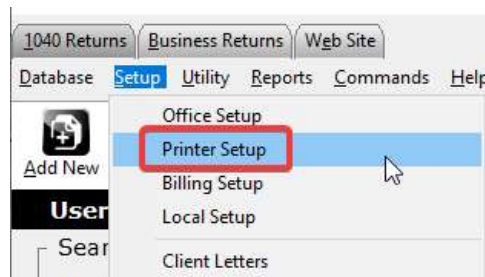

- a. **Enter your Google Email Address and Password** if you already have a Google email account.
- b. If you do not have a Google Email account, **Click Register for a FREE Google e-mail account**. Then follow the on-screen instructions.
- c. **Advanced-SMTP Settings (Optional)** enter information in this area, if needed for customer server configuration.

The screenshot shows the 'Email' tab in a software configuration window. The window has tabs for 'Registration', 'E-Filing', 'Overrides', 'Defaults', 'General', 'Auth/Audits', and 'Email'. The 'Email' tab is active. The text inside the window reads: 'Email was designed to allow you to contact your customer base through the email messaging feature. This service is free for you to use and only requires use of a Google email account or other SMTP email accounts.' Below this is a note: 'NOTE: Your customer must have a valid email account to receive your message(s).' The 'Mail Settings' section contains fields for 'Email' and 'Password', and a button labeled 'Register for a FREE Google e-mail account'. The 'Advanced - SMTP Settings (Optional)' section contains fields for 'Server URL' (with 'smtp.gmail.com' entered) and 'Server Port' (with '587' entered). There is also a checkbox for 'Include EFIN and receipt number in message' which is currently unchecked. At the bottom right are 'OK' and 'Help' buttons.

Printer Setup

Printer setup configuration of the program can be set by clicking **Setup**, then clicking **Printer Setup** menu option.

Printer Settings Tab

The settings located on this tab allows for selection of default printers to be used by the program.

- Prompt for Tax Return PDF** causes a prompt to appear when printing a return and allows for the tax return to be created as a PDF document.
- Use GDI Printer Interface** allows the program to use a GDI printer for printing returns.
- Tax Return, Check, Report** drop down menus allow selection of a printer for each function.
- Check Printing - Adjustments** are done in increments of one-tenth of a line if you need to adjust the text on a check. Increasing the number by one raises the text one-tenth of a line whereas decreasing the number lowers it.
- Check Printing - Remote Printing by Site** will enable the ability to print checks at remote sites.
- Tax Estimator – Number of Copies to Print** increases or decreases the numbers to the desired number of copies.
- Signature Pad Selection** allows the selection of signature pad types.

The screenshot shows the 'Printer Settings' tab with the following options:

- Default Printer(s):** Includes checkboxes for 'Prompt for Tax Return PDF' and 'Use GDI printer interface'. Below are dropdown menus for 'Tax Return', 'Check', and 'Report', each with 'Prompt to create PDF for Return Printing' selected.
- Check Printing:** Includes a numeric input for 'Adjustment in 1/10th Line Increments' set to 50, and a checkbox for 'Remote printing by site'.
- Tax Estimator - Number of Copies to Print:** Includes a numeric input for 'Tax Estimation' set to 1, and checkboxes for 'EF Declaration / PIN Authorization' and 'Privacy Letter'.
- Signature Pad Selection:** Includes radio buttons for 'Topaz Pad', 'Scriptel Pad', and 'On-Screen Signature', with 'Topaz Pad' selected.

1040 Return Printing Tab

It is possible to print multiple copies of a tax return, as a print packet, with a single click when printing the final tax return. This screen is where print packets are defined.

The column headings on this tab indicate the various components within the packet. Place a checkmark next to each item in the column that you want printed as part of the return packet.

Note: "Send to Printer," must be checked, otherwise the forms selected for printing **WILL NOT** be printed.

Items denoted with an "X" will always print with a return set. A dash (-) denotes forms that cannot be printed with a return set.

The screenshot shows the '1040 Return Printing' tab with a table of items to be printed. The columns are: Print Order, Preparer, Client, e-Filed, Federal, and State (Only if Not E-Filed). The 'Send to Printer/PDF' row is checked in the Preparer column.

Print Order	Preparer	Client	e-Filed	Federal	State (Only if Not E-Filed)
8453 / 8879	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	X	-	-

Print Options Tab

This Tab contains all other print related settings. A description of each setting can be viewed by hovering the mouse cursor over the settings name.

- Batch Printing Options** allow you to configure if returns print individually or in a batch.
- PDF Printing Options** are used to configure where PDFs are stored, and what options are used in their creation.
- Current Form/Bank App Options** control what prints out with an individual form or bank app.
- Referral Coupons** section has options to set the coupon amount and expiration date.
- The remainder of the options can be used to fine tune what is printed with a return based on the office needs.

The screenshot shows the 'Print Options' tab with various settings. The 'Batch Printing Options' section includes 'Batch Print on Ctrl+P' (set to 'Print Immediate') and 'Batch Print on Ctrl+T'. The 'PDF Printing Options' section includes a 'Path' field with a 'Browse' button, and checkboxes for 'Use External PDF Reader', 'Use SSN/EIN for file name', 'Always encrypt generated PDF', and 'Always email doc'. The 'Current Form/Bank App Options' section includes checkboxes for 'Asset Detail w/Bus Activities', 'Overflow Detail(s)', and 'No payment voucher with 8879', along with a 'Print Worksheets' dropdown set to 'All'. The 'Referral Coupons' section includes 'Coupon Amount' and 'Expiration Date' fields. The bottom section contains numerous checkboxes for specific print options, such as 'Print Preparer Copy Only if Verified w/Error', 'Print Page Numbers', 'Print Payment Voucher w/Paper Returns', 'Print Site ID on Each Page', 'Completed on Print Final for Paper Returns', 'Print field values in BOLD', 'Print Tax Summary With Bank Documents', 'Print Copy Separation Pages', 'Add Printed Preparer's Name to Main Form', 'No Print Final on Invoice Due', 'Print 8879/8453 with Bank Documents', 'Exit Tax Return on Print Final', 'Do Not Print 1040ES with Final Return', 'Do Not Print Page 2 of Invoice', 'Do Not Print Itemized Form Billing', 'SSN Masking for EF', 'Disable Income Summary Signatures', 'PTIN Masking for EF', 'Opt-out Completed Return Transfer', 'EIN Masking for EF', 'Print Invoice w/ 8879/8453 EF Documents', '8879 Last Printed Verify', 'Print date on page 1 of 1040 return', 'Exclude Privacy Letter', 'RTN/DAN number masking for EF IRS DD', 'Signature Block', and 'Always print E-Signed Documents'. There are also dropdowns for 'Signature Block' (set to 'Preview') and 'Black Out'.

Bus. Return Printing Tab

It is possible to print multiple copies of a tax return, as a print packet, with a single click when printing the final tax return. This screen is where print packets are defined.

The column headings on this tab indicate the various components within the packet. Place a checkmark next to each item in the column that you want printed.

Note: “Send to Printer,” must be checked, otherwise the forms selected for printing **WILL NOT** be printed as part of the return packet.

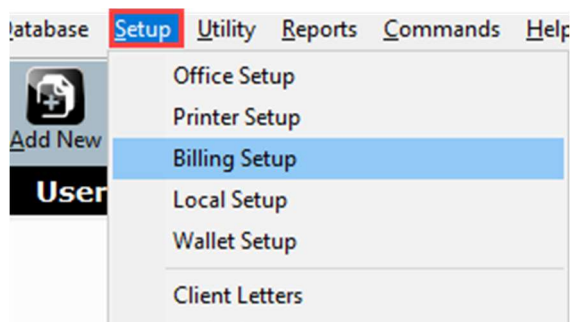

Items denoted with an “X” will always print with a return set. A dash (-) denotes forms that cannot be printed with a return set.

The screenshot shows the 'Bus. Return Printing' tab with a table of print components. The table has columns for 'Print Order', 'Preparer', 'Client', 'e-Filed', 'Federal', and 'State Only If Not E-Filed'. The components listed are: 8453 / 8879, Client Data Screen, Engagement Letter, Federal Client Letter, State Client Letters, Schedule K-1 Letters, Diagnostics, Invoice, Financial Statements, Federal Return, State Return(s), Asset Detail, Worksheets, Overflow Detail(s), Privacy Letter, Water Mark, Send to Printer, Send to Archive, and Send to E-Mail. Checkmarks are placed in the appropriate columns for each component. For example, '8453 / 8879' has checkmarks in 'Preparer', 'Client', and 'e-Filed'. 'Federal Return' has checkmarks in 'Preparer' and 'Federal'. 'State Return(s)' has checkmarks in 'Preparer' and 'State'. 'Send to Printer' has checkmarks in 'Preparer', 'Client', 'e-Filed', 'Federal', and 'State'. 'Send to Archive' has checkmarks in 'Preparer', 'Client', 'e-Filed', 'Federal', and 'State'. 'Send to E-Mail' has checkmarks in 'Preparer', 'Client', 'e-Filed', 'Federal', and 'State'.

Billing Setup

Billing can be configured by clicking **Setup**, then clicking the **Billing Setup** menu option.

General Tab

In this section, information that will be displayed on the invoice and other billing configuration options are set.

- Billing Scheme** is a drop-down menu that allows selections of a billing scheme to edit.
- Click **Save As...** and enter a scheme name to create a new billing scheme, otherwise **Click OK** to save to a scheme you have already created.
- General Office Information** in this section is for entering the business name and location for it to appear on the invoice
- The main billing settings are below **General Office Information**. They affect how invoicing will occur. Hover the mouse above the input box or check box for a description of the item.

A screenshot of the 'Billing Setup' dialog box. The 'General' tab is selected and highlighted with a red box. The dialog has a title bar 'Billing Setup' and a close button 'X'. Inside, there's a 'Billing Scheme' dropdown menu showing '1040', a 'Billing ID' field with '1001', and buttons for 'Delete' and 'Save As...'. Below these are tabs for 'General', 'Form Billing', 'Worksheet', 'Line Items', 'Discounts', 'Custom Charges', 'Custom Settings', and 'PPR Settings'. The 'General' tab contains a section 'General Office Information' with a sub-section 'Office Information to be printed on each billing invoice' and a 'LOAD' button. Below this are several input fields and checkboxes for various settings: 'State Sales Tax Rate', 'Self Prepared Flat Fee', 'No Prior Year Balance on Invoice', 'Don't Bill for Sch A when using STD Deduction', 'Turn Off Default Bank App Disbursement Options', 'Prevent transmit on returns with balance due fees', 'Disable Invoice Warning Errors', 'Tax Preparation Discount', 'Default Hourly Rate', 'Disable Invoicing', 'Bill For EF Forms Only', 'Collect Tax on Billings?', 'No Prior Year Preparation Fee on Invoice', and 'Validate the Prior Year Balance'. At the bottom, there's a note: '* To apply the updated billing scheme to an existing or current return, press CTRL+U while in the return' and buttons for 'OK' and 'Help'.

Form Billing, Worksheet, and Line Items Tabs

These three tabs set the prices for itemized billing. **All three tabs are configured in the same manner.** Refer to the following guidelines below for any selection of the three tabs.

- The **Form Billing** drop down box allows selection of US-Federal forms and State forms for itemized billing pricing.
- Under the **Base QTY** column, enter the number of forms that the **Base Price** amount will include. For example, in the screenshot to the right, a taxpayer with 1, 2, or 3 W-2's would be charged a total of \$45.00 for all of the W-2's. A taxpayer with 4 W-2's would be charged \$55.00 (\$45.00 for 3 W-2's and \$10.00 for each additional W-2.)
- To charge per form individually, enter an amount in the **Per Item** column only.

Form	Name	Base Qty	Base Price	Per Item
RET 1040	US Individual Income Tax Return			
RET SCH 1	Additional Income and Adjustments to Income			
RET SCH 2	Tax (AMT, 8962 and Other Taxes)			
RET SCH 3	Nonrefundable Credits, Other Payments, Refundabl...			
FRM W-2	Wage and Tax Statement	3	45.00	10.00
FRM W-2G	Certain Gambling Winnings			
FRM W-4	Employee's Withholding Allowance Certificate			
FRM W7	Application for Individual Taxpayer Identification			
FRM W7 COA	Certification of Accuracy for IRS ITIN			
FRM W-2PR	Puerto Rico Withholding Statement			
FEC RECORD	Foreign Employer Compensation / Pensions			
K-1 (1041)	Beneficiary's Share of Income, Deductions, Credits			
K-1 (1065)	Partner's Share of Income, Deductions, Credits			
K-1 (1120S)	Shareholder's Share of Income, Credits, Deductions			
WKS NOL	Net Operating Loss Worksheet			
SCHA	Itemized Deductions			
SCUB	Interest & Dividend Income			

* To apply the updated billing scheme to an existing or current return, press CTRL+U while in the return

Discounts and Custom Charges Tabs

Defining custom discounts and charges can be applied to the invoice in a tax return. The **Discounts** and **Custom Charges** tabs are configured in the exact same manner. Select the desired tab and follow the instructions above to configure itemized billing.

- Discounts** - first create a unique name for the discount. Then enter either a discount percentage or a discount amount in dollars.
- Custom Charges** are set up in like manner as discounts; however, you can only enter a dollar amount.

Discount Name	Discount Percentage	Discount Amount

Note: Entering both Percentage and Amount will apply the Percentage discount up to the discount Amount

* To apply the updated billing scheme to an existing or current return, press CTRL+U while in the return

Custom Settings Tab

Ancillary products offer value to clients and potential revenue opportunities for the ERO. By including an Add On (Mark Up) to ancillary products, you can increase your revenue with each return. This section covers the ancillary products and services, and how to include an Add On.

- Place a check mark in the **Auto Add Financials** column to add the ancillary product to each tax return that includes a bank product.
- Place a check mark in the **Auto Add Non-Financials** column to add the ancillary product to each tax return that does not include a bank product.
- In the **Add On Fee /Mark Up Amount** column, type the desired Mark Up for each ancillary product.

Form	Auto Add Financials	Auto Add Non-Financials	Base Fee	Add On Fee/Mark Up Amount
iProtect			53.95	
Audit Assistance, Protection Plus			44.95	
Remote Signature Fee			5.00	

Important Note: If you have already pre-set configurations for these affiliate partner programs during enrollment, disregard the steps above unless you want to make changes.

Transmitting and Updating

This section will cover how to transmit a return to the IRS, and how to process system updates.

Queueing and Transmitting Returns to the IRS

Following are the steps provided for transmitting Federal and State Returns electronically.

- While inside a return, verify *Form 8879* is attached and complete.
- Click the **Queue Button** located in the toolbar.

Note: The program verifies the Federal and State Return for errors before transmission. Review any errors in the return. If there are no errors, the "Transmission" dialog appears.

- The program automatically selects the Federal and State return for transmission if the electronic filing information is completed in each return. Click **Queue**. The program then takes you to the WIP (Work in Progress screen).

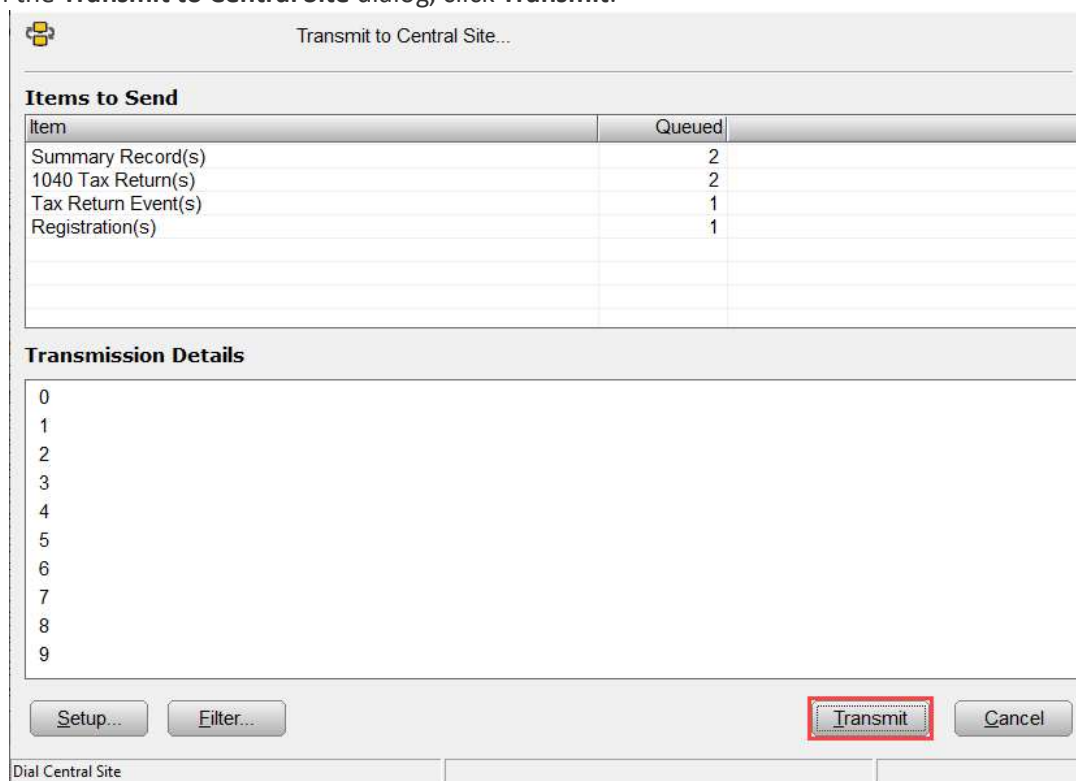

Updating the 1040 software

Steps to Install Updates on a Transmitting Computer:

- a. If on a network, close the program on all workstation computers.
- b. In the program, click **Transmit** on the toolbar.

- c. On the **Transmit to Central Site** dialog, click **Transmit**.

- d. When the transmission is complete, click **Software Updates** on the **WIP (Work in Progress)** screen). If the link for Software Updates is unavailable, no updates are available for install, and the program is up to date with the features and tax law changes.

Work In Progress Summary

Tax Returns	Transmit Queue
Select a Return	Transmit to Central Site
Status Summary List	Recover from Archive
Management Dashboard	
Training Returns	
Mobile Application Retrieval Utility	
Printing Queue	Exceptions/Rejects
Checks, Registers, and Activation	Fed Rejects
Tax Returns	State Refused and Rejects
Proformas	Fed Refused
Federal Acknowledgement Letters	Fed/State Alerts
State Acknowledgement Letters	Verify Retrieved / Feeder Returns
	Bank Rejected
	Pending Remote Signatures
	Completed Remote Signatures
Other Items	Quick Reports
Software Updates	8453 Status Report
Secure E-Mail	Checks Ready
Bulletins	IRS Ack Counts
Today's Appointments	
Backup Returns	

- e. Click **Apply All**, and the program installs all available updates.

Enhanced verify for rejects

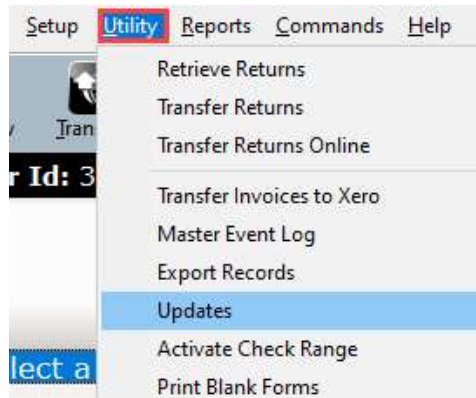

Added Where's My Refund status form

Software Updates

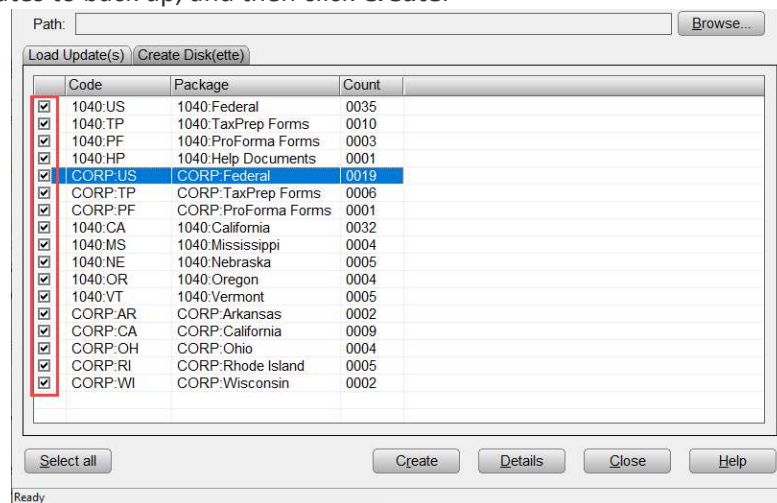

Apply All Print Close

Steps to Install Updates on a Non-transmitting Computer:

- From a transmitting computer, create a backup disk. To create a backup disk, follow these steps:
- On the **Utility** menu, click **Updates**.

- c. Click **Browse** and choose the location where you want to save the update files. You must back up updates to removable media such as a floppy disk or Flash drive.
- d. Select the updates to back up, and then click **Create**.

- e. From the non-transmitting computer, insert the backup disk into the USB or disk drive.
- f. On the **Utility** menu, click **Updates**.
- g. On the **Load Update(s) Tab**, click **Browse**. Browse to the location of the backup disk, and then click **OK**.
- h. Select the updates to install, and then click **Load**.
